Experience Summary

Mr. Billings is a graduate of West Texas A&M University, where he studied Environmental Science with a minor in Biology. As an Environmental Specialist, Mr. Billings has assisted with field investigations for environmental assessments, asbestos surveys, wetland delineations/determinations, karst surveys, and threatened or endangered species surveys, as well as conducting records searches for these types of projects. Records research for projects has included water well records, gas and oil well/pipeline records, soil and geology information, FEMA floodplain information, Travis/Williamson County karst zone information, environmental agency database records, state and federally listed T/E species records, and wetlands information. He has participated in presence/absence surveys for various threatened or endangered species including the golden-cheeked warbler, timber rattlesnake, Texas horned lizard, indigo snake, and reticulated collared lizard. Mr. Billings also contributes to Horizon's GIS mapping services. He currently provides graphics support for Phase I Environmental Assessments and various other projects.
