**Experience Summary**

Mr. Flesher is a graduate of Texas A&M University - Corpus Christi, where he studied Environmental Science. As an Environmental Specialist for Horizon™, Mr. Flesher conducts record searches and field investigations for environmental assessments and wetland determinations/delineations. He also prepares applications for Section 404 nationwide and individual permits from the US Army Corps of Engineers. Records research experience includes water well records, gas and oil well/pipeline records, soil and geology information, and wetlands information. He has participated in presence/absence surveys for various threatened or endangered species including the golden-cheeked warbler, timber rattlesnake, Texas horned lizard, indigo snake, reticulated collared lizard, and gopher tortoise. Mr. Flesher also contributes to Horizon's GIS mapping services. He currently provides graphics support for Phase I Environmental Assessments, Section 404 jurisdictional delineations, and various other projects.
