- Field Effort Leadership

Experience Summary

As an Archeological Technician, Mr. Mudd has participated in a number of Texas Department of Transportation (TxDOT) projects, including all phases of cultural resources management (CRM). Mr. Mudd has considerable experience in the archeology of the Texas region. He currently serves as Archeological Technician for field efforts including reconnaissance, pedestrian survey, monitoring, National Register of Historic Places (NRHP)/State Archeological Landmark (SAL) eligibility testing, and data recovery. He also conducts artifact curation procedures required by the Texas Archeological Research Laboratory (TARL), archival research using the Texas Historical Commission's (THC) online site atlas, and contributes regularly to report writing.
