With This Firm: 7

Relevant Experience Summary

- FERC-related Environmental Inspection
- Phase I Environmental Site Assessments
- Water Quality Surveys
- Aquatic Baseline Surveys
- Fishery Services
- Archeology

Experience Summary

Mr. Wiersema has more than 7 years of field experience at Horizon. Over that period, he has participated in numerous aquatic ecology and fishery surveys, wetland planting projects, Phase I Environmental Site Assessments (ESAs), and environmental inspection on pipeline projects as well as many archeological projects.

Mr. Wiersema has recently provided environmental services for the Longhorn Partners Pipeline in Texas, including active construction environmental inspections, post-construction stormwater monitoring, monitoring of horizontal directional drill sites, and inspections within wetlands and creek crossings. He has participated in environmental inspection training courses including Longhorn Pipeline Environmental & Safety Training, Marathon Pipeline Inspection Training, and has completed a 32-hour course in Phase I ESAs. In recent years he has been involved in many different archeological projects throughout Texas and in Oklahoma.
