Experience Summary

Briana Smith has participated in numerous cultural resource surveys, including all phases of cultural resources management (CRM). She has considerable experience in the archeology of Texas and Louisiana, and has served as the project archeologist for many surveys in those regions. She currently serves as a staff archeologist for field projects including reconnaissance, pedestrian survey, monitoring, National Register of Historic Places (NRHP)/ State Archeological Landmark (SAL) eligibility testing, and data recovery. Ms. Smith conducts artifact curation procedures required by the Texas Archeological Research Laboratory (TARL), and archival research using the Texas Historical Commission's (THC) online site atlas. She also participates in report writing and produces graphics using GIS mapping software.
