## Experience Summary

Ms. Goldstein is an archeologist with over five years of experience in cultural resource management. She has worked on a variety of projects from Phase I surveys through Phase III data recovery. She has completed archeological resource survey for several projects in the energy sector including oil and gas pipelines, wind, and solar power infrastructure building. She also has considerable experience in the transportation sector ranging from archeological survey for rail development to Phase III data recovery for new road construction. She has also completed several projects on behalf of local government entities throughout Texas.

Ms. Goldstein's archeological expertise is in historical archeology and archival research, especially historic cemetery location and recordation, though she also has considerable experience in recordation, excavation, and analysis of prehistoric sites. She has held Texas Antiquities Code permits as a Principal Investigator and has helped clients navigate all stages of cultural resource compliance in Texas, from permit application through final report acceptance and approval from the Texas Historical Commission.
